

Protective Relays 101

Part 1

A collection of concept descriptions necessary for the understanding of protective relays, from
Relay Training Center Software and Seminar.

Protective Relays 101

Table of Contents

Line Constants	4
Quadrants	5
Phasors and Phasor Diagrams	6
Primary Ohms to Secondary Ohms Calculation	7
Rectangular to Polar Conversions	7
Watts Calculation	9
Vars Calculation	9
Power Factor	10
Load Angle	11
Phase-To-Phase Voltage Calculation	12
Open Delta Voltage Conversion	12
Symmetrical Components	13
Symmetrical Component Notes:	14
Symmetrical Components Phasor Chart A-G Fault	15
A-G Fault Sequence-Vectors	15
A-G Fault Phase-Vectors	15
Symmetrical Components Phasor Chart B-C Fault	16
B-C Fault Sequence-Vectors	16
B-C Fault Phase-Vectors	16
Symmetrical Components Phasor Chart 3-Phase Fault	17
3-Phase Fault Sequence Vectors	17
3-Phase Fault Phase-Vectors	17
Positive Sequence Calculation	18
Negative Sequence Calculation	19

Zero Sequence Calculation	20
Zero Sequence Compensation	21
Ko Calculation	22
Forcing Neutral Current	24
Directional Units	25
Impedance Calculations	26
Impedance Plots	29
Views of a Fault	31
Other Useful Information	40
KWH Meter Multiplier	40
Timed Watts	40
Percent Deviation	40
Transducer Output Calculations	41
Distance Conversions	42
Weight Conversions	42
Volume Conversions	43
Temperature Conversions	43
Resistor Color Codes	44
Relay Training Center Test #1	45
Relay Training Center Test #1 Answers	48
